Professional Summary

Motivated and adaptable data enthusiast with a strong foundation in Python, SQL, Power BI, and Excel. Demonstrated ability to collect, analyze, and visualize data through various projects. Eager to leverage technical expertise and curiosity in AI and automation to drive data-driven strategies in a dynamic environment.

Data-related skills

Python: Data Analysis, Automation, Web Scraping

SQL: Data Querying and Management

Excel: VLOOKUP, Pivot Table

Visualization: Power BI

AI & Automation Skills

AI/ML concepts: Familiar with LLMs and AI Principles

Automation Tools: Familiar with Zapier

Junior Data Analyst Certificate

Apollo Opportunity Foundation x Generation Hong Kong

August 2025 - October 2025

- Completed a **13-week intensive hybrid program** focused on data analysis fundamentals, including Python for data manipulation, SQL querying, Excel pivot tables, data cleaning/ETL processes, and visualization with Power BI.
- Developed practical skills through **employer-aligned projects**, preparing for entry-level data analyst roles.
- **Sentiment Analysis for Restaurant Review Validation**
Aimed at authenticating customer reviews of Hong Kong restaurants scraped from

OpenRice.com by comparing sentiment scores generated by a large language model (LLM) with the average rating scores submitted by the original reviewers. Followed with further analysis on how various factors such as cuisine, price range and district influence the proportion of authentic reviews.

- **Numerous Data Exploration**

Aimed at using **SQL queries** to analyze sales metrics, such as total sales by category and average order value, while demonstrating proficiency in data aggregation through functions like SELECT, GROUP BY, RANK(), and INNER JOIN.

Professional Experience

Administration Clerk

Global Credit Management Company

Hong Kong | Feb 2023 - Aug 2023

- Mastered at least 1 new skill daily during week 1 and achieved independent task proficiency after week 2.
- Managed data entry and documentation, maintaining accuracy in records using Excel with colleagues from other departments.

Outdoor Interviewer

Nielsen Corporation

Hong Kong | Feb 2022 - Sep 2022

- Conducted an average of 80 5-minute field surveys with diverse respondents to gather accurate, reliable data for analysis.
-

Education

Secondary 6 graduated

SKH Bishop Mok Sau Tseng Secondary School

Interest

- **Continuous Learning Investment**

Honed my skills in financial data analysis using Python, SQL, recognizing the power of data-driven insights for investment and financial planning.

- **Passion in Sports**

Moneyball Theory inspired me by demonstrating how data analytics can revolutionize decision-making, motivating me to apply similar techniques in business contexts.
